

Migma Radar Display Programming

Migma Radar has settings that will display one of the following legends depending upon speeds measured by the radar unit:

- When no vehicles are present, the display shall remain dark
- For measured speeds more than 10 MPH below the speed limit, it shall remain dark
- For measured speeds of 10 MPH below the speed limit up to equal to the speed limit, it shall display the measured speed as a steady number
- For measured speeds 1-10 MPH above the speed limit, it shall display the measured speed as a flashing number
- For measured speeds greater than 10 MPH above the speed limit, it shall display a steady message of "SLOW DOWN" in two lines of text.
